PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate at VIT Bhopal University with experience in AI/ML, SaaS product development, and full-stack application development. Passionate about building impactful technology through research, scalable software, and real-world problem-solving.

EXPERIENCE

amasQIS.ai — AI Engineering Intern

April 2025 – September 2025

- Developed AI solutions for PPE detection and medical coding using RAG, computer vision, and open-source LLMs.
 - Developed FastAPI pipelines for efficient inference, data preprocessing, annotation, and model evaluation. Collaborated cross-functionally across teams to ensure model robustness.
-

PROJECTS

1. StackAudit | AI Tool Cost Optimization & Repository Audit Platform - [Demo Link](#)

- Developed a SaaS platform StackAudit, for auditing 7+ AI tools using a rule-based engine for subscription analysis and cost optimization.
- Created pricing intelligence, automated savings estimates, and shareable audit reports with dashboards.

2. ArthAI | AI-Powered Financial Intelligence Platform - [Demo Link](#)

- Created a full-stack financial platform for budgeting and AI support for middle-class households.
- Implemented a modular architecture for conversational AI and explainable financial recommendations with scalable backend integration.

3. QuizWiz | AI-Enhanced Learning & Assessment Platform - [Github Link](#)

- Engineered a full-stack quiz platform integrating Open Trivia DB and a Qwen-1.5B AI model to generate topic-based questions automatically and convert PDFs into interactive quizzes.
 - Developed a dynamic user interface with customizable quiz creation, enhancing usability and reducing manual input by 60%.
